"A compendium of centuries-old hand-drawn and page-long satellite maps, Cartographic Grounds plots the transformation of the ancient art form of mapmaking into a type of modern graphic design." --- Metropolis
Présentation de l'éditeur

Mapping has been one of the most fertile areas of exploration for architecture and landscape in the past few decades. While documenting this shift in representation from the material and physical description toward the depiction of the unseen and often immaterial, Cartographic Grounds takes a critical view toward the current use of data mapping and visualization and calls for a return to traditional cartographic techniques to reimagine the manifestation and manipulation of the ground itself. Each of the ten chapters focuses on a single cartographic technique-sounding/spot elevation, isobath/contour, hachure/hatch, shaded relief, land classification, figure-ground, stratigraphic column, cross-section, line symbol, conventional sign-and illustrates it through beautiful maps and plans from notable designers and cartographers throughout history, from Leonardo da Vinci to James Corner Field Operations. Mohsen Mostafavi, dean of the Harvard Graduate School of Design, introduces the book. Biographie de l'auteur

Jill Desimini is an assistant professor of landscape architecture at Harvard University Graduate School of Design. Charles Waldheim is the principal of Urban Agency in Cambridge, MA, and the John E. Irving professor of landscape architecture at Harvard University Graduate School of Design. He is the author of PAPress's Landscape Urbanism Reader.
